Support This Bylaw

On Wednesday the ratepayers of Kelowna will be asked to approve by their votes a bylaw which will permit the city to raise \$150,000 for a two-year road paving program. It is a bylaw which should receive an overwhelmingly affirmative vote.

Last year the City Council was able to have permanently paved some four miles of some of the principal streets. After a year's use it is obvious that this type of paving is the only satisfactory paving for our heavy traffic streets. But it is expensive.

With rising school and other costs, Council this year has no funds, at the current mill rate, to divert to paving. Moreover, roads are one of the capital fixtures which should be paid for over a period of years as they are used. Today they cannot be paid for out of current revenue and so it is a case of pay-as-we-use or no more paved streets at all.

If this bylaw passes, it will mean that finances have been provided for a considerable portion of our main arteries; only a few miles of these will remain without permanent paving. But the effect of the paving reaches much further. In the past, the greater part of the city road budget has been spent in endeavoring to keep the heavy traffic streets in a reasonable condition. Every mile of these streets permanently paved means that money formerly used on maintaining this mile is released for improving secondary or residential streets. Pave ten miles of the main traffic streets and probably another fifteen miles of residential streets can be brought and kept in good condition. Thus the road building bylaw is of vital interest to all property owners as, though the money will be spent on main arteries, the ordinary street maintenance money will be released for other streets, including that in front of his property.

There is no necessity of arguing the wisdom of having good streets; that is too obvious to need laboring here. The only question at stake is whether or not the right approach has been made by the City Council to the question. In our view the right approach has been made. The only alternative—if we are to improve our streets—is to increase the tax rate by ten or fifteen mills and, even then, obtain an inferior job.

The passing of the new bylaw will mean an implementation of a paving program which in two or three years should see all the main arteries and many of the secondary streets put into such shape as will give this city the best streets of all the smaller cities of this province.

On Wednesday the road paving bylaw should receive a very large vote and it should all be of an affirmative nature.

Clean-up This Week

This is cleanup week in Kelowna and under the sponsorship of the Kelowna Junior Chamber of Commerce the householders are asked to clean up those untidy corners about their property and to paint where paint is needed.

The Jaycees and the City have co-operated in arranging that all refuse gathered by the householders and business firms in their cleanup and placed at the lane line will be picked up and taken away by city trucks. It is an opportunity of getting rid of those unsightly piles of rubbish and, by so doing, of contributing to the general appearance of the city. Kelowna has a reputation of being a clean, well-cared-for city, but rubbish does collect and now is the time to get rid of the winter's accumulation. A bath makes us all feel better; a little cleaning-up and a little painting will give the city that bright and shining look that a good bath gives the human being. Let's co-operate with the Jaycees.

MANY SUGGESTIONS

Plans Already Underway For Giving '52 Kelowna Regatta More Publicity

PUBLICITY for the 46th annual Kelowna International Regatta is already underway.

First meeting of the 1952 publicity committee was held on Thursday evening at the home of the chairman W. V. Nicholson. In attendance were Bill Palmer, Bob Scott, Jack Bews, Ed Boyd, Russ Abraham, Terry Bennett and Babe Nicholson. Many ideas were discussed during the three-and-a-half hour meeting, including the repainting of Ogopogo together with a sign reading: "Kelowna's Ogopogo invites you to Canada's Greatest Water Show, July 31, August 1 and 2."

The committee feels that Ogopogo should be given maximum attention and that, since the name Kelowna is firmly identified with the celebrated lake denizen, the city should go all out to maintain this international recognition.

The committee is considering the idea of having the monster floodlit at night. One suggestion was that a fountain-like effect with colored lighting would be effective. The cost may prove prohibitive but the matter will be looked into.

Two signs which were formerly mounted on the tops of automobiles last year, will be put to a different purpose this time. One will be placed in close proximity to the Ogopogo, the other possibly attached to the back of some long-distance van, should such permission be extended.

PUBLICIZE REGATTA

Purpose of having Ogopogo in tip-top shape, together with signs advertising the Regatta, is that thousands of tourists and visitors take pictures of the Ogopogo each year and it provides an excellent opportunity to publicize the Regatta.

A sign "Welcome to Kelowna" will soon appear on the roof of the Kelowna Aquatic Club if the unanimous

HOLLAND HONORS CANADIAN DEAD IN ANNUAL CEREMONY

SCHOOL CHILDREN of Bergen Op Zoom, Holland, place flowers on the graves of 1,200 Canadian soldiers in an anniversary ceremony of the liberation of the Netherlands from the Nazis. The graves of Canadian servicemen who fell in Holland are regularly cared for by children of the district. Right, Pierre Dupuy, Canadian Ambassador to the Netherlands, lays a wreath at the foot of the Cross of Sacrifice as part of the ceremony.

Garrish Re-elected President of BCFGA

DIRECTORS of the BCFG from the central area could not agree who should represent this district on the central executive of the association and on the board of governors of B.C. Tree Fruits, with the result that the representatives for this area were chosen by ballots cast by the association directors from the entire district. This took place at the annual meeting of the directors on Thursday last. The results of the Fruit Board meeting which took place in the morning were reported in Thursday's Courier.

The new executive of the BCFG is composed of A. R. Garrish, president, and J. G. Campbell, Salmon Arm; J. M. Kosty, Vernon; S. Pearson, of Glenmore; C. MacKenzie, Summerland; J. Hall, of Creston.

The men nominated as governors of B.C. Tree Fruits and who will be elected by the shareholders of that organization at a latter date were: J. Ellis Wood, Salmon Arm; T. P. Hill, Coldstream; T. Towgood, Oryama; L. G. Butler, East Kelowna; J. Snowsall, Glenmore; A. Millar, Oliver; W. R. Powell, Summerland; Reg. Duncan, Penticton and J. S. Hall, Creston. G. A. Barrat will be nominated by the fruit board as its representative on the B.C. Tree Fruits board.

Nominated as directors of B.C. Fruit Processors Ltd. were the following: Peter Wing, Kamloops; A. W. Gray, Oryama; L. Deighton, Oliver; W. R. Powell, Summerland; C. C. MacDonald, Penticton; and L. G. Butler, East Kelowna. Gordon Desbray will be the fruit board's nominee to this board. These men will be elected by the shareholders at the company's annual meeting. Before the election of the BCFG executive, G. D. Fitzgerald, of East Kelowna, announced that he could not allow his name to stand again. He emphasized that the sole reason for his decision was personal. He had lost much of his orchard and had to rebuild it. "I must look after my personal affairs," he said. Several directors spoke in laudatory terms of Mr. Fitzgerald's past services and a vote of appreciation was passed.

FAILED TO AGREE

The usual practice in the election of directors and the selection of nominees for Tree Fruits and Fruit Processors is for the directors from the various geographical areas to decide before hand who they will present to represent their particular area. If this is not done, then those nominated are voted on by the directors from the entire fruit area.

The central area this year could not agree and the following were nominated for the central post on the executive: Nigel Taylor, East Kelowna; S. Pearson, Jr., Glenmore; J. Follmer, Rutland. Mr. Pearson was elected.

J. W. Johnson, of Penticton, and C. MacKenzie, of Summerland, were nominated for the executive to represent the south.

Mr. Pearson replaces Mr. Fitzgerald on the executive and C. MacKenzie, of Summerland, replaces G. Lundy of Oliver in the southern districts post.

Nominated by directors representing central district locals for the board of governors of Tree Fruits were L. G. Butler; J. Snowsall; G. Day of Glenmore; J. H. Blackey of Westbank; F. Moore of East Kelowna. Messrs. Butler and Snowsall were elected.

JOHN M. TAIT AMONG UBC GRADUATES

John Michael Tait, son of Mr. and Mrs. S. M. Tait, 578 Leon Avenue, graduated from UBC Thursday, with a bachelor of arts degree 2nd class.

Mr. Tait has accepted a position as pursuer on a Yukon excursion boat for the summer months, and will return to UBC in the fall for a teacher's course.

Unfortunately Mr. Tait's name was inadvertently left off the list of names released by UBC and which was published in last Thursday's Courier.

May Drop Allan Cup

(Special to The Kelowna Courier)

KAMLOOPS—Okanagan Senior Amateur Hockey League may abandon participation in the Allan Cup and content itself with an all-B.C. hockey season, ending around April 15.

The proposal was discussed informally at the annual meeting here yesterday afternoon but the decision was deferred until another gathering to be held June 8 in Kelowna.

One of journeying along the Allan Cup trail, particularly in the alternate years when the finals are in the east, is held to be too much of a gamble for this province's senior hockey clubs.

If the league decides not to participate in the Allan Cup it will probably establish a 30 or 36-game schedule with a B.C. title playoff taking place during the weeks when the B.C. champion normally is the only senior hockey team in action in this province.

CROWD PRESIDENT

The ultimate decision also will hinge on the action to be taken by the Western International Hockey League. If the WHL stays in the Allan Cup race, the OSAHL would hardly tackle another calibre alone.

Barrister A. F. Crowe of Vernon was elected league president, succeeding Dr. R. A. Hughes of Kamloops. Bill McCulloch of Penticton is the new vice-president.

The Kelowna Senior Hockey Association was not represented at yesterday's meeting owing to a confusion about the date.

A. R. GARRISH re-elected president

Snowsall were elected. Mr. Butler was a member last year on the board while Mr. Snowsall will replace Mr. Day.

Mr. MacKenzie as elected by the directors. Another change in the board of governors was in the mainline representation where J. Ellis Wood replaces D. I. Sinclair.

Change in the fruit processors directors was confined to one. Peter Wing will represent the mainline (Turn to Page 5, Story 2)

BULL CLAIMS

Only Criticism Against Liberal Party Is BCHIS And Five-Year Licenses

THURSDAY night at his home district, Okanagan Mission, Liberal candidate for South Okanagan, C. R. Bull, opened a series of speeches which will carry him through the riding.

Mr. Bull stated of all the work done by the Coalition government, of which the Liberal party was the senior member, the only two real criticisms he had heard were against hospital insurance and five-year licenses. Against these, B.C. has seen a galaxy of achievement. He deplored the introduction of another political party as something which would make for the further difficulty of any one party obtaining a clear majority. He alluded to the confused situation existing in France as a result of the multiplicity of parties. The Liberal party, stated Mr. Bull, is the only party with a reasonable chance of obtaining a clear majority in the next House.

Mr. Bull paid tribute to Premier

Vernon Wins Track and Field Meet In Spectacular Finish; Twelve New Records Set

AGGREGATE STANDINGS

CLASS A (Enrollment of 500 or more.)
Vernon 114; Kelowna 113; Penticton 43; South Okanagan (Oliver-Osoyoos) 32.

CLASS B (Enrollment between 250 and 499.)
Rutland 33; Salmon Arm 20; Armstrong 15; Summerland 4.

CLASS C (Enrollment 249 and under.)
Enderby 8; Similkameen 5; Lumby 1; Princeton 1.

SUPREMACY of the Golden Owls and Golden Owlettes in valley track and field affairs came to a slow halt Saturday as the twenty-fifth annual Okanagan High Schools meet ended in a Vernon High School victory in probably the most tense and tightest finish seen in the spectacular history of the classic.

The blue-and-white thinclads from VHS, with inspiring support from scores of backers, dethroned KHS by one point, ending with 114 to Kelowna's 113. So the Vernon Cup emblematic of the Class A championship, went back to Vernon for the first time since 1947. From 1948 to 1951 inclusive the valley standard flew over the Richter Street and Harvey Avenue edifices.

Neither the victory or the margin by which it was accomplished was an out-and-out surprise, for Vernon has been building for the past few years for this. The northers predicted either a triumph or a terrific race in going down.

Terrific it was but it could have been more so, from a Kelowna standpoint, if Owl Dennis Casey could only have emulated his name sake a little more and flew a little higher over the bar.

For with the count standing 114-113 in Vernon's favor, Kelowna still had a chance to tie or win in the final event of the day. This was the boys' 14 and under high jump, an event that dragged on so long it never actually finished until half an hour after the balance of the program was concluded.

PRESSURE TOO GREAT

When the score of 114-113 was put up on the board for all to see a shudder went through the Vernon ranks and a wave of optimism hit the Kelowna cause. Particularly so when it was learned the Vernon jumper already was knocked out of the event.

Young Casey, one of the four re-

City Employee Dies On Job

Daniel Getz, a laborer with the city for several years, collapsed while working on a job on Harvey Avenue this morning. He was declared dead upon his arrival at the hospital.

Funeral rites will be announced later by Day's Funeral Service.

TRADE SCHOOL ENLISTMENT

Richard Bartier, 2579 Pendozi Street, son of Mr. and Mrs. Alph Bartier, has enrolled in the Greer Shop Training Inc. refrigeration and air conditioning school in Chicago, according to a news release issued by H. P. Harshbarger, superintendent of the school.

LABOR HEAD WARNS:

Tolerance, Co-operation Between Labor And Management Necessary

"If we do not have tolerance, co-operation, understanding and high motives from both management and labor in our economic life, we could find ourselves in a very serious situation," Darcy Baldwin, chairman labor relations board, warned delegates attending the 3rd annual Okanagan District Trades and Labor Council banquet Saturday night.

"I believe that the aims and objects of management and labor are identical. We need the highest type of leadership from both groups."

Referring to the labor relations board, Mr. Baldwin stated "it is and can be a common vehicle that can be of mutual assistance to both management and labor."

HIGHER WAGES

Mr. Baldwin said average weekly wage in B.C. is five percent higher than the second placed province of Ontario, and 48 percent higher than the lowest province.

He said 60 percent of the people in B.C. major industries work the 40 hour week; in Ontario, the percentage is 35, while in the maritimes it is six percent.

George Wilkinson, A.F. of L. and T.C. appointee on the labor relations board, declared "as a member of organized labor, I have a great feeling of satisfaction for the head way you are making in the valley, a definite contribution to the welfare of the Okanagan."

W. H. Fleck, vice-president of the ODTLC, in thanking the speaker, stated that "organized labor in the valley will use the power it possesses with equal integrity and justice to every organization in the dominion."

"We have no political affiliations whatsoever, and are primarily concerned with building a labor organization—an organization composed of people with differing beliefs."

J. I. McLeith, president of Okanagan-Mainline District Associated Boards of Trade, stated purpose of the organization is to "knit the valley together," and make it a better place in which to live.

LIQUOR PLEBISCITE

"Iron out differences when they arise and avoid strikes," he advised. He thought much could be accomplished around a conference table.

Mr. McLeith pulled no punches insofar as the liquor plebiscite is concerned.

2,000 ATTEND SONG, DANCE FESTIVAL

Over 2,000 people jammed the Kelowna and District Memorial Arena Saturday night for the third annual Folk Song and Dance Festival, sponsored by the Kelowna Rotary Club.

In order to give the event adequate coverage it so worthily deserves, shortage of space prohibits running the story in today's Courier. Full details will appear in Thursday's issue.

CITY WOMAN WILL FACE THEFT CHARGE

Arrested in Regina, a former local bakery employee was brought back to Kelowna for trial on a charge of theft of funds entrusted to her care.

Mrs. Florence Abrams, aged about 32, will appear before Magistrate A. D. Marshall in city police court tomorrow. She is alleged to have stolen over a period of time, \$1,500 from McGavin Bakeries Ltd., where she was employed as a stenographer.

TAKE NO CHANCES

Cats Will Follow Dogs So Canines Will Not Ruin Gyro Pet Parade

GYRO Club officials are taking no chances on the canine family ruining the May 24 pet parade which will highlight a diversified entertainment program in The City Park next Saturday.

Order of the parade calls for the cats following the dogs, instead of the dogs following the cats, as was the case last year. Much to the dismay of parade officials, the animal instinct immediately came to the fore last year when the canine "pets" spied their feline foes, complete with ribbons and bows, strutting in front of the judges. Many of the cats leapt to the nearest tree when they found a snarling dog on their tail.

This year's pet parade calls for every type of animal imaginable. Long dogs, short dogs, large dogs, medium dogs, short dogs, long-haired cats, short-haired cats, chick-

ens, lambs, kids, goats—these are but a few of the entries. And just, but not least, there will be prizes for decorated bicycles and tricycles.

Parade will move off from the tennis courts at 9:30 a.m. and after judging is completed, a diversified sports program will wind up activities.

Prizes will be awarded pet parade winners and to those who win races. In addition, special awards will be made to kiddies who enter the various events.

An entry form for the pet parade appears on page 3 of today's Courier. These should be turned in to Norman Delfart at Melkie's Store.

Parkinson Suggests City Investigate Possibility of Forming Utility Co. To Handle Natural Gas Distribution

INVESTIGATION into the possibility of the city forming a utility company to handle the distribution of natural gas in the event the Westcoast Transmission Company routes a branch line through the Central Okanagan, was suggested by Ald. Dick Parkinson at last week's council meeting.

Matter came up following receipt of a letter from Percy Richards, executive assistant to Premier Byrnes, thanking council for a copy of a brief recently sent to the board of transport commissioners. The brief requested the transport board to give consideration to routing the pipeline from Kamloops to Osoyoos, via Kelowna, pointing out that it would service more people than if it was routed via Merritt and Princeton.

Mr. Parkinson thought the city should investigate the possibility of operating the utility company, before granting permission to a private company.

Mayor J. J. Ladd agreed, adding that many cities which have sold their public utilities, are regretting the move today.

ENGAGEMENT
Mr. and Mrs. Eric Beck, 740 Lawson Avenue, Kelowna, announce the engagement of their only daughter, Marguerite, to Mr. Gordon Hamilton, of Banff, Alberta, son of Mr. and Mrs. William Hamilton, Kelowna.
The wedding will take place at Evangel Tabernacle, Bertram Street May 31, at 7:00 p.m.

Nine Rebekah Lodges Have Delegates at Convention

Eighty-six members represented nine Rebekah Lodges at the 19th annual meeting of the Okanagan Rebekah District Association No. 1 held in the Armstrong Parish Hall. Lodges represented were Vermilion No. 24 Princeton, Golden Heart No. 60 Oliver, Redlands No. 12 Penikese, Faith No. 32 Summerland, Kelowna No. 38 Kelowna, Kalamalka No. 6 Vernon, Sunset No. 29 Armstrong, Olive No. 44 Enderby and Dove No. 69 Salmon Arm.

Mrs. Willa Marshall of Sunset Rebekah Lodge No. 29, Armstrong, was chairman. Assembly officers present were Mrs. Katharine Haner, Vernon, president, Mrs. Edith Granger, of Kelowna, warden and Mrs. Pearl Betts of Penikese, assembly musician. Visitors from Vancouver, Alberta and Manitoba were also present.

Reports from these lodges showed increased progress in the work of the order and excellent support of the projects sponsored by it. These include the IOOF Bursary fund which assists students, Institute for the Blind, White Rock Camp for underprivileged children, and Haynes International Park. Support was also given to the Loyal Protestant Home, Red Cross and Cancer Campaigns, Rheumatism and Arthritis Fund, Boy Scout Association and to community projects.

TEEN FORUM

By OLI DAUM

Hi Kids! I woke up one morning and it suddenly dawned on me that I wasn't hearing much about the teen-agers these days. "What," I thought, "there are so many teenage activities and no one knows about them?"

I'm sure there are many that aren't just sitting twiddling their thumbs, meaning and bemoaning about the lack of entertainment and the sad state of affairs of the teenager. Yes, I think so, and I also think it's time some laurels were thrown your way.

It's not so long ago since I too went to school and was a member of Teen Town and a sad day it would have been if someone had not popped up every once in a while and given us a plug. Well, I'm going to pop up every Monday.

My scrapbook is cluttered with newspaper clippings about kids I know and some of the most inspiring moments I spend are those when I go paging through this honorable book of history. I wouldn't miss it for the world and I'd hate to see anyone else miss it.

And now if you'll pardon me I'll just mosey off and see what I can dig up for next Monday's gab-fest. We'll be seeing you, huh?

BLOSSOM TIME VISITOR
Mrs. A. R. McKay left on the weekend for her home in Vancouver after spending two weeks in Kelowna as the guest of Mr. and Mrs. George Nelson Taylor, Patterson Avenue.

Royal Family Congratulates Couple On Golden Wedding

Buckingham Palace sent a letter of congratulations to Mr. and Mrs. George Read, 2606 Richter Street, for the celebration of their golden wedding anniversary, May 13, while Mrs. G. Botting, from England, a sister of Mrs. Read, sent congratulations in a bouquet of yellow roses.

Mr. and Mrs. Read received approximately 30 guests from 8:00 to 11:00 p.m., among them their five children and their families, Mr. and Mrs. J. Duvonen, Kamloops; Mr. and Mrs. P. Ingles, North Vancouver; Mrs. F. M. Shires, Prince George; Mr. and Mrs. J. F. Prince, Kelowna; Mr. George Shires, Prince George and Mr. and Mrs. R. W. Read and daughter Carmen from Smeterville, Idaho.

A buffet supper was served from a table draped with a lace cloth centred by yellow roses and carnations, and the pink and white anniversary cake.

Following the presentation of a purse to the celebrants by their son on behalf of the family, a toast was proposed by Mr. T. B. Hamilton. Mr. G. Read responded. Mrs. Read wore yellow roses on corsage. Mr. Read a yellow rose boutonniere.

Mr. and Mrs. Read were married at Pembroke Dock, South Wales and have lived 40 of their 50 wedding years in B.C. They came to Kelowna two years ago. They have five children and 12 grandchildren.

BORN AT KELOWNA GENERAL HOSPITAL

Pleading guilty in city police court May 9 to driving while his ability was impaired by the use of alcohol, Harry Cruthers was fined \$50 and costs.

CLEAR "WASTE" AWAY AND SAVE THE DAY when you're feeling SLUGGISH

Get rid of body wastes and see how quickly "lazy" feelings due to poor elimination give way to sparkling pep and zest! These energy-robbing wastes accumulate not only from sluggishness of the alimentary canal, where your food digests—but also as a result of lazy kidney action. Millions of people all over the world have found Kruschen Salts to be a useful corrective, for such troubles. Why? Because Kruschen is both laxative and diuretic—it promotes healthy action in bowels and kidneys. Gently but thoroughly. Just a little Kruschen with your morning beverage when needed helps you keep thoroughly clean inside... "on top of the ball" all day, every day!

Week-end Chatter

by MIL CRITTENDEN

Flying to Mexico for the Rotary International convention are R. P. Walrod, L. L. Kerry and R. W. Corner who left today for Mexico City. Tiny Walrod plans to make this a combined business-and-holiday trip and will stay on in Mexico for a week or two after the convention ends. He hopes to open up a new market there for B.C. Fruit Processors' new concentrated apple juice.

The Honorable Nancy Hodges, Speaker of the House, will address a Kelowna audience at a luncheon sponsored by the Kelowna Liberal Women's Association next Friday. Mrs. Betty Collinson, president of the Liberal Women, is busy making arrangements for this affair which will be held at the Royal Anne Hotel. This luncheon is open to the public and is expected to attract a large crowd of both men and women.

Some of us housewives who feel that we're "busy" should stop to consider the crowded itinerary of the Honorable Nancy Hodges. On Friday, for instance, her speaking tour includes a talk at Pentiction in the morning, the luncheon at the Royal Anne at 12:15, and a tea with another talk at Vernon in the afternoon. Friday evening she is slated to address a meeting in Armstrong.

The Kelowna Liberal Women's Association hopes to entertain another distinguished guest when and if Mrs. Byron Johnson accompan-

ies her husband on his speaking tour.

Mr. and Mrs. W. J. W. Reid, of Hamilton, Ont., spent a few days in Kelowna visiting Mr. Reid's mother, Mrs. M. L. Reid and his sister and brother-in-law, Mr. and Mrs. A. C. McFetridge, Cadder Ave. Mr. Reid was recently appointed by Trade Commissioner C. D. Howe to be director of gun production with headquarters in Ottawa.

I met Mrs. Louise Kerfoot in the park Wednesday afternoon. This was Louise's "day off" as her cleaning woman was doing the housework at home. And how was Louise spending her leisure hours in the Park? She was wielding a vacuum cleaner in the Aquatic Club!

Louise was one of a "bucket brigade" of Aquatic Club members, all working like busy beavers cleaning, scrubbing and climbing precariously on shaky step-ladders. It's marvelous to see the zeal with which the Aquatic Club girls are starting the new season.

Their pet project at the moment is a plan to have the hallway brightened up with a new coat of paint. Taking their cue from the color scheme of the draperies, they have decided on a combination of spruce green for the ceiling, walls in-chartreuse and end walls in deep coral. They plan to add to the nautical atmosphere at the Aquatic with ropes, life savers, etc.

The Aquatic Club fashion show is slated for June 4 this year and will be convened by Mrs. Marie Walrod. She'll be assisted by Mrs. Pat Trueman.

Most of the fashion shops in town will contribute their very smartest summer ensembles to be modelled at this show and each store will choose its own models. This promises to be a gala event as Marie and Pat are planning something just a bit "different."

Speaking of fashion, the opening of "Laurie's" specialty shop Thursday drew such an unprecedented crowd that they ran out of orchids. Personally, I had so much fun looking at the merchandise that I didn't mind missing mine.

Scanning fashion magazines is a hobby as well as a business necessity with me and I can say, without exaggeration, that almost any one of the costumes shown at Laurie's could have stepped out of the pages of Glamour, Mademoiselle, Charm, Vogue or Harper's Bazaar. The styles were all so fresh and new—and most newsworthy of all were the stunning fabrics.

The trend toward "Fairytale fabrics" was highlighted in this collection. These were misty, miracle nylons and orlons... feathery, billowy cottons... paper-thin voiles, many more. Fragile looking fabrics with a delicate air, but with surprisingly staunch wearing qualities. Some were brightened with a tracery of gilt, like etched or hammered metal.

A fascinating visitor in Kelowna last week was Miss Hazel Merritt who was the house guest of Mr. and Mrs. Ken Garland. Miss Merritt, who is back in Canada from Bolivia where she is a medical missionary, is currently making a speaking tour of Western Canada. She returned from South America on a furlough, her first in more than five years, and has been addressing the Baptist conventions throughout the western provinces. While in Kelowna she addressed the Okanagan Valley Baptist convention at First Baptist Church here. She left yesterday for Manitoba and on her return will speak in Calgary and Vancouver.

Miss Merritt is a graduate of UBC and took her nurses training at Vancouver General. She was formerly instructor of nurses at Jubilee Hospital, Victoria, and at one time was supervisor at the hospital in Ocean Falls.

Mr. and Mrs. S. M. Tait were a couple of very indignant parents last week—and with good reason! They were getting sympathetic phone calls from friends who thought that their son, John, had

failed to make the grade in his final exam at UBC. Actually, he passed with second class honors! Somehow his name was omitted from the lists of UBC graduates submitted to the Courier by UBC. This mix-up resulted in considerable confusion for the Tait.

John had to miss convocation at UBC as he was due to start his summer job as purser at Lake Jaspish, just south of Whitehorse. His parents went down to Vancouver last week to give him a send-off on the Princess Louise which took him up as far as Whitehorse.

The Gyrettes are cooking up some bright ideas for the 24th of May party which they will entertain their husbands and friends at the Royal Anne. Mrs. Alice Winsby who is in charge of entertainment, tells me that she has contacted Madame Zahu, a clairvoyant from Kingston, and who is touring the interior of B.C. and may be available for readings.

WANTS PARKING SPEED LIMIT LAWS ENFORCED

Necessity for overhauling traffic regulations in the city with special emphasis on parking regulations on the main street and speeding through The City Park, was stressed by Ald. Dick Parkinson at Monday night's council meeting.

Mr. Parkinson was somewhat critical of the RCMP who, he claimed, are not enforcing the one-hour parking limit. The alderman also suggested that the 15-mile-an-hour speed limit through the park be rigidly enforced.

The discussion resulted in a suggestion from Ald. Jack Treadgold that the city consider hiring two local policemen for enforcing traffic regulations. "It seems to me the RCMP are bogged down with red tape," he declared.

Mayor Ladd countered with the remark that the RCMP are chiefly interested in crime, "and not this petty stuff."

Ald. Parkinson agreed with Ald. Treadgold, and thought the police would welcome the move. "We have a man patrolling the industrial area, and he has worked out very satisfactorily," he said.

He recommended that next year's council consider the suggestion before signing the new police agreement.

TRAFFIC LIGHTS
Earlier in the evening, Ald. R. F. L. Keller was somewhat over the "complete disregard of motorists" for failing to give pedestrians the right of way in traffic lanes. He suggested the traffic committee study the situation. In other cities, it was pointed out, motorists have to give pedestrians the right of way, otherwise they face prosecution.

Ald. Art Jackson suggested extending the time of the "amber" signal, as he thought this would give pedestrians a better chance to cross the street before the lights changed.

The traffic control committee will be requested to submit a recommendation to council.

BULL URGES NEED FOR STRONG GOV'T

At the monthly meeting of the Kelowna Women's Liberal Association Monday evening, Mrs. Ian Collinson, president, gave an informal report of her recent attendance at the B.C. Liberal convention in Vancouver. During the report, she announced that the 1953 convention will be held in Vernon.

In an address to the meeting, C. R. Bull, South Okanagan Liberal candidate, emphasized the necessity of the election of a responsible government with a clear majority, composed of men experienced in the administration of government business.

A. W. Gray pointed out that the Liberal party is a national party which has been in power seventy-five to eighty percent of the time in the history of Canadian Parliament.

Two films, "The Story of Standards," a most informative film on the government supervised grading and inspection of foods, and "Nova Scotian Handicrafts," shown under the direction of Mrs. John Acland, proved both entertaining and educational.

Before the close of the meeting, arrangements were made for luncheon to be held in the Royal Anne Hotel, Friday, May 30, at which Mrs. Nancy Hodges will be guest speaker. Tickets will be available to the public and may be obtained at the Liberal committee rooms or from members of the Kelowna Women's Liberal Association.

LEON AVENUE GETS TREATMENT

City public works department has dug out part of Leon Avenue, in front of McGavin's Bakery, in an effort to construct a permanent road. Ald. R. F. L. Keller reported to council Monday night.

Mr. Keller said the roadbed had completely collapsed, and it was necessary to dig it out and put in crushed rock in order to bring the thoroughfare up to standard. Crews are also patching roads, while marking off streets with traffic lines is almost completed.

FOOD START
ITALIAN—Heavy drift ice in the Northumberland Strait which is usually clear by the third week of April struck hard at fishermen. Damages to traps and other gear was estimated at upwards of \$10,000 in the Pugwash area, and lobsters were unusually scarce because of the cold water.

INITIAL OFFER \$575

Foto Nite Opens Tuesday At Paramount Theatre

FOTO NITE, claimed to be Canada's biggest cash offer presentation, will start at the Paramount theatre Tuesday and will be a regular Tuesday night presentation.

Foto Nite is an occasion whereby through the co-operation of the audience and a stage contest, a name is selected and that person is offered money for the purchase of his or her photograph. The person must be at the theatre that evening to accept the offer in person.

Tuesday night's initial offer is \$575, which includes men's and ladies' Bulova watches valued at \$150 from Don Lange Credit Jewellers; \$100 credit on the purchase of any vehicle from Orchard City Motors; \$100 worth of ladies' clothes from F & M ladies' ready-to-wear store; Westinghouse food mix-master and copperclad cooking wear from Bennett's Hardware store.

Stage contest will take place at 8:30 p.m. Tuesday and will be in addition to the regular film "Japanese War Bride." All a person has to do to be eligible for the offer is to register his or her name at the theatre and be at the theatre on Tuesday night. Children under 14 years of age, cannot take part in the contest.

Insofar as photographs are concerned, it was pointed out it is not necessary to bring pictures to the theatre until one week after the offer has been accepted. The person sells the photo to the Paramount theatre for the stated amount of cash.

CITY WANTS COMPENSATION FOR BLACKTOP

Mayor J. J. Ladd informed City Council recently that he had conferred with E. S. Jones, deputy minister of public works, regarding the government compensating the city for blacktopping Water Street between Bernard and Mill Avenues.

City was recently informed that a portion of Mill Avenue between the new ferry wharf, and Water Street between Mill and Bernard Avenues had been gazetted as part of the government highway.

Mayor Ladd suggested that part of Mill Avenue between Water and Ellis Street be done by the provincial government to compensate the city for the other portion of the road. Mr. Jones promised to take the matter up with officials when he returns to Victoria.

use any additional tourist camp licences until increased traffic warranted additional accommodation.

As an alternative, Ald. Knox suggested that a permit be issued, post-dated to March 31, 1953. However, Mayor J. J. Ladd stated the present council has no authority to tie the hands of next year's council.

Ald. Jack Treadgold stated the proposed plan differed from the original suggestion, in that the cab-

SPORTS SPHERE

City Ballmen Alone In Second After Big Triumph at Oliver

KELOWNA'S senior baseball club may have no name as yet but that hasn't stopped the team from winning games or showing their heels to four of the other five clubs.

The locals yesterday jumped on Oliver for a convincing 8-1 victory—their third league win in succession—to climb into sole possession of second place, behind the still undefeated Pentiction Athletics.

(Athletics were beaten Saturday night, however, in an exhibition game under the Pentiction lights as Bo Carlson pitched Kelowna's nine to a smart 7-3 victory.)

Kelowna's secret to success of this season, setting down the hometown Oliver clubbers with five hits—all singles. He struck out seven and issued four free tickets to first.

The visiting Orchard City squad pounced on starting pitcher P. Thompson for three runs in the first inning, sending him to the showers in favor of Steffin. Kelowna boosted the lead to 7-0 before the Oliverites notched their first and only run in the bottom of the sixth.

As noteworthy in the overall league picture was Kamloops' final snapping of their winless string. They took the Summerland

AWAY THIS WEEK

Boxla Night In Kelowna Thursdays

Action in the four-team Interior Lacrosse Association's senior B league begins on two fronts this week with Vernon opening the season at Kelowna Thursday and Salmon Arm raising the curtain in Kamloops the same night.

Boxla night here will be mostly on Thursdays, with nine of the 12 games set for that night of the week. Two come on Saturday and the other on Wednesday.

One notable aspect of the schedule, released by ILA officials here last week, is that not one game is slated for a Saturday night game, with games in both places coming off often on the same week-end.

PICK TEAM TONIGHT

There'll be a full-dress workout for the Kelowna Bruins tonight, beginning at 7:00, after which Coach Al Laface is expected to name his starting lineup for Thursday's opener. All players are to be on hand tonight with all their equipment.

Schedule up to July 1 follows:

22 (Thurs.)—Vernon at KELOWNA; Salmon Arm at Kamloops.

27 (Tues.)—KELOWNA at Vernon.

28 (Wed.)—Kamloops at KELOWNA.

30 (Fri.)—Vernon at Salmon Arm.

3 (Tues.)—Vernon at Kamloops.

5 (Thurs.)—Salmon Arm at KELOWNA.

7 (Sat.)—KELOWNA at Salmon Arm; Kamloops at Vernon.

10 (Tues.)—Salmon Arm at Vernon.

11 (Wed.)—KELOWNA at Kamloops.

14 (Sat.)—Vernon at KELOWNA; Kamloops at Salmon Arm.

17 (Tues.)—KELOWNA at Vernon; Salmon Arm at Kamloops.

19 (Thurs.)—Kamloops at KELOWNA.

20 (Fri.)—Vernon at Salmon Arm.

24 (Tues.)—Vernon at Kamloops.

26 (Thurs.)—Salmon Arm at KELOWNA.

28 (Sat.)—KELOWNA at Salmon Arm; Kamloops at Vernon.

30 (Mon.)—Salmon Arm at Vernon.

Still Room At KART Banquet Of Champions

Final size-up for Wednesday's Banquet of Champions will be made at a special committee meeting of Kelowna Athletic Round Table tonight.

Public response has been fairly good, but there's room for more. Persons wishing tickets should phone Jack O'Reilly (6047), Bob Taylor (2729) or Percy McCallum (7084).

The fate, purpose of which is to give civic recognition to the champions of the past winter, will be at the Kelowna Aquatic. Main guest speaker will be Eric Whitehead, Vancouver Province columnist.

ALD. PARKINSON TO ROLL FIRST BOWL WEDNESDAY

Official opening of the Kelowna Lawn Bowling Club season is set for Wednesday afternoon, with Ald. R. F. Parkinson doing the honors. Members of the Vernon club will assist for the occasion.

Club officials again point out the club is "anything but exclusive" any anyone wishing to join is welcome to do so. It is claimed that for what a person gets out of the club activities, the membership fee is the lowest for any sport in the central Okanagan.

RUTLAND NINE STILL UNBEATEN

Rutland Advances continued on their undefeated way when they shut out Vernon Aces 5-0 at Rutland yesterday in a B.C. Interior Baseball League game. The win, fashioned by hurler Ed Gulliver, consolidated Rutland's grip on first place.

Pete Plastiras pitched Kamloops Okonots to a convincing 10-3 victory over Winfield at Kamloops in the day's only other league encounter. Revelstoke Spikes, the fifth team in the circuit, were idle.

SHERWOOD MINOR PUCK HEAD VERNON—Annual meeting of the Vernon Minor Hockey Association, concluding one of the most successful seasons on record, elected E. G. Sherwood as president.

Lost or Left at Valley Track Meet

As always seems to happen, several articles were either lost or left behind at Saturday's track and field meet. A list of the articles is contained under the "found" column on the classified page.

Owners may have these articles by calling at the Courier sports department and identifying them.

NOMADS GET NO SHELTER FROM JUNIOR CHIEFS

Kelowna Chiefs yesterday began showing their intent to make it tough for any other club in the valley that tries to wrest their 1951 championship from them when they pasted Naramata Nomads 10-3 before a good-sized crowd, in Athletic Oval.

Hickson showed lots of stuff and good control as he chalked up Kelowna's second win in three outings. Chiefs edged Vernon 3-2 in the league opener but dropped 8-5 decision at Summerland.

The Vernon team found the going a little too rough at Summerland yesterday as the homesters gained their second South Okanagan Junior Baseball League triumph in succession, this time by the score of 9-5.

Name-Team Contest Drawing to Close

Booster drive and name-the-team contest, staged by the Kelowna Baseball Association, will end Tuesday at 5:00 p.m.

All entries must be in the hands of officials by that time. Person submitting the winning name will receive a new bicycle.

George Hill, Palmer Better Hundred to Pace Sharpshooters

Two marksmen cracked the century mark May 11 during the weekly practice shoot of the Kelowna B.C.D. Rifle Association at the Glenmore range. Both George Hill of Kelowna and Harold Palmer of Enderby scored 101 out of a possible 105.

Other scores of 90 or better were: C. Henderson 99; D. Hill 98; G. Kennedy 97; R. Weeks 96; P. Janzen 95; P. Kitch 95; B. Foote 93; W. Franko 91; Mrs. L. Franko 91; Glenda Hill (junior) 90. Next shoot is Sunday at 9 a.m.

CITY APPROVES PAYING \$3,000 TO HOCKEY CLUB

The Kelowna and District Memorial Arena commission was granted permission by City Council last week to overdraw its account by \$3,000 in order that outstanding bills of the Kelowna Hockey Club may be cleaned up.

Actually the figure represents 20 percent taken in gate receipts when the Packers first entered the playoffs. The hockey club requested all the gate receipts so that outstanding debts may be paid.

Insofar as the arena commission is concerned, this is merely a book-keeping entry, but it was necessary to have council's approval, it was explained.

"Vernon Day" May 24

"Vernon Day," the feature tournament of the Vernon Golf Club will likely attract a goodly number of Kelowna shotsmiths May 24. The meet is open to all Interior golfers and has several trophies and cups as well as prizes for the low net and low gross winners.

TENNIS TOURNAMENT MAY 24 The Kelowna Lawn Tennis Club will stage an American tournament May 24, open to members and non-members alike.

LAWN BOWL TOURNAMENT Annual tournament of the Interior Lawn Bowling Association will be held in Vernon this year, July 1, 2, and 3.

More About 1. VERNON WINS TRACK

(From Page 1, Col. 8)

six process for KHS with victories in the final three pulling down a big Vernon lead to the final 114-113 standing. The last two relays—senior girls 440 and senior boys 880—were both accomplished in new times by the Owlettes and Owls.

Individually there were enough stars to fill the firmament but standouts were Larry Yakimovitch and Natalie Haluschak of Vernon and Roy Barlee, Royce Moore, Phyllis McMurdo and Ted Johnson of Kelowna.

Pint-sized but fleet of foot, young Yakimovitch smashed two junior boys' records in a sensational performance. He reduced the 75-yard time from 8.6 seconds to 8 flat and broad-jumped 18 feet 3½ inches, 2½ inches better than the previous record.

BARLEE NEVER THREATENED

Miss Haluschak chalked up two first for Vernon, winning the girls 16 and under broad jump and clipping two-tenths of a second off the 75-yard sprint record, clocked at 8.8 seconds.

Barlee was untouchable in the 200-yard dash, clocking 28.2 seconds, the half mile and the mile in easy fashion. Royce Moore also picked up two firsts (one in a relay) as well as two seconds.

A new record in the girls' 20 and under hurdles was set by Miss McMurdo. She was timed in 9.8 seconds, a fifth of a second better than the previous 10-second record.

Also in there with a fine record-smashing performance was Ted Johnson who tossed the discus 121 feet, 11 inches, more than four feet better than the previous best of 117 feet, 9 inches. Ted's throw also bettered Vancouver's high school record by 3½ inches.

SPRINT ACE CASUALTY

Vernon's chances of eventually winning were dimmed shortly after 3:00 p.m. when their sprint ace, Don Nolan, collapsed at the finish line in winning the senior 100. A doubtful starter due to a pulled muscle earlier in the Spring, Nolan fell across the line with Kelowna's Don McKenzie only a step off the pace.

A doctor and the trainers dared hope he might make the final relay but he couldn't. He has been advised to lay off running for several weeks.

Still strong after his mile victory, Barlee felt he could have made the run in better time (it was 4:48) if B. McCallan of Armstrong hadn't set such a fast pace in the first quarter.

McCallan's rapid run, requiring Barlee to keep from getting too far behind, took more out of both runners than the Armstrong youth figured. McCallan couldn't finish the second lap and Barlee just couldn't get up a full boiler of steam in the final dash.

RUTLAND WINS, TOO

Rutland's junior girls and jumpers Ross Baker and Bob Campbell were the main cogs in the conquest of Class B laurels. The girls gained

eight points in a relay win and Baker and Campbell five each.

Acknowledgment was also made of the silver anniversary of the track and field meet with addresses by Frank Venables, of Oliver, past president of the Okanagan Valley School Trustees Association and president of the B.C. School Trustees Association, and School Inspector A. S. Matheson.

Prior to the start of the events in the afternoon, Mayor J. J. Ladd of Kelowna spoke briefly, officially opening the new 440-yard track.

Detailed results of the track and field meet will appear in Thursday's Courier.

FISHED OUT OF SEASON
Appearing in district police court Joe Mayear pleaded guilty to a charge of fishing during closed season. Stipendiary Magistrate A. D. Marshall fined him \$10 and costs.

More About 3 PLANS ALREADY

(From Page 1, Col. 2)
ing to Ontario, Alberta, California or even New York State, these are occasions when plenty of publicity should be taken along. Government folders are expected to arrive this week and these are given free, as with all Regatta publicity material, except headgear.

Five hundred Regatta bumper cards have been ordered and these will be ready within one week. In three or four colors to arrest attention, they will be superior to previous ones.

NO STICKERS
They will be ready to affix to bumpers with fine wire. Windshield stickers will be passed up this year. Difficulty of getting a good quality, fadeproof sticker at a reasonable price, is the main reason, plus the fact that they are hard to get off and some

motorists resent having them stuck on their windshields.
Instead a publicity-type of postage stamp put out by the Imperial oil company will be used. These are about four times the size of an ordinary postage stamp and feature Canadian scenes of each province, with a minute amount of room at the bottom for the printing of a local message. Further information is being sought in regard to the stamps.

The committee is highly appreciative of the fact that Mrs. Bob Scott will serve as the committee's voluntary secretary, as much correspondence ensues during the summer. This offer typifies the community spirit that prevails in Kelowna, making the Regatta the great success that it has become.

ARTHRITIC QUOTA NOW OVER \$3,000

Total of \$3,000 has been collected to date in the Kelowna and district Arthritic and Rheumatism Society's annual campaign. Quota is \$3,500. Canvass is expected to be completed by the end of this week. Ellison and North Benvoulin both have obtained their quotas, while two other districts have reached objectives although the drive is not completed.

MERCHANTS CASH PHONY CHECKS; FORGER JAILED

Deaf-mute Peter Giesbrecht is back behind bars again with an assist from merchants in city and district who honored his worthless cheques.

Giesbrecht appeared in city police court for sentence, following his guilty plea on four counts of uttering forged documents. The four cheques totalled \$135.

Police Magistrate A. D. Marshall imposed sentences of 15 months, nine months, and six months on the two lesser counts, all terms to be concurrent. On a fifth charge, that of obtaining \$10 worth of goods from a Rutland merchant by false pretences, Giesbrecht was sentenced to three months, also concurrent with other sentences.

CHARTERED ACCOUNTANTS HOLD PARLEY

Matters of interest to chartered accountants were discussed at the regular monthly meeting of the Council of the Institute of Chartered Accountants of B.C. held in the board room of B.C. Tree Fruits Ltd. on Saturday.

This was the first time in the history of the institute that a council meeting has been held in the interior. Members of the institute from Kamloops to Penticton were

hosts to visiting members at a cocktail party and dinner held in the Eldorado Arms in the evening. Dinner party was under the chairmanship of E. A. Campbell, of Kelowna, interior member on the council and at whose invitation the meeting was held in Kelowna.

Visiting members from the coast were J. E. McIntosh, president; J. L. Helliwell, vice-president; H. Norman Lunn, secretary-treasurer; Lorne McLean, president elect, Institute Chartered Accountants of Canada; C. V. B. Corbet, D. R. Larkin Johnston, J. R. A. Kinninmont, W. F. Martin, members of the council.

R.C.M.P. PROBE WHEREABOUTS OF VEHICLE

Royal Canadian Mounted Police are more than slightly curious to know what happened to a certain automobile near the Winfield school Saturday night.

Their curiosity was aroused by

William Lodge, Winfield farmer, who reported an unidentified auto caused slight damage to his property. Tire and wheel marks showed the auto was in the ditch on both sides of the road, ending up in the unfenced orchard.

One other aspect is certain: the vehicle was towed away.

Night-time ITCH Of Toes And Feet Can Almost Drive You Crazy

When feet burn, sting, itch—and shoes feel as if they were cutting right into the flesh—stop at the nearest drug store and ask for a small original bottle of *Moore's Emerald Oil*.

It's a wonderful formula—this combination of Essential Oils with Camphor, Chlorothymol and other antiseptics—so good that thousands of bottles are sold annually for relief from the almost unbearable itching of Athlete's Foot. Get a bottle today and prove it for yourself. Never have you found such fast and effective relief—and a good night's rest.

Local SODICA Plant Is One Of Four Modern Dairies Operated By Farmers

OFFICIAL opening of the recently-completed SODICA plant in Kelowna, located on Richter Street in the north end of the city, will take place on Wednesday afternoon. The public is invited to inspect the premises between 3 and 6 p.m. The local SODICA plant is one of four modern dairy plants built and operated by dairy farmers of the Okanagan.

Other plants are operated at Salmon Arm, Enderby and Vernon. There is plenty of land available for future expansion of the Kelowna plant. This is one of the most modern and up-to-date milk processing plants in the province.

Construction is of reinforced concrete and pumice blocks, stuccoed on the outside and coated with cement plaster inside. The rooms are exceptionally bright and airy. Cross ventilation has been carried out in every department.

Milk is received from trucks and enters the weigh room on roller conveyors. It is then weighed on the 500 pound Toledo dial scale. Samples are taken from each shipment and a record of shipment is made. The milk then passes through a filter to the pasteurizers which are located in the next department. The farmers' cans are washed on a De Laval rotary can washer and are perfectly sterile and dry when returned to the farms.

STERILE BOTTLE
The pasteurizing process is carried out in Cherry-Burrell spray type pasteurizers. Milk is immediately cooled by the plate cooler method using chilled water. Bottling follows immediately after cooling and the milk is then conveyed on roller conveyors to a milk storage room which is held at approximately 34 degrees F. All bottles returned from customers enter the plant on the opposite side to milk receipts. They are washed in a Gleton, six-wide, soaker washer, which produces a sterile bottle. These bottles are not touched by human hands after being placed in the machine until they have been capped and ready for sale.

Milk and milk products are bottled fresh daily, and are delivered to the consumer in the early hours of the morning to avoid the mid-day heat, as far as possible. In addition to storage for milk and butter, the Kelowna plant is also equipped with a sharp room suitable for storing ice cream, frozen foods, etc. A stock of all ice cream products and frozen foods is maintained at Kelowna at all times. A stock of farm supplies including cream separators, milking machine equipment and parts, etc., is maintained at this branch for the convenience of shippers in the district.

Milk and milk products are distributed in the City of Kelowna by

DISTRICT DAIRY FARMERS REALIZE LENGTHY AMBITION

"The dairy farmers of this district who are members of the Kelowna branch of SODICA have been looking forward to the day when this creamery would be opened," said K. R. Young of Okanagan Mission.

"For years past it has been their ambition to have their own creamery and to have a say in the running of their business. With the formation of this co-op they can now say they are shipping their produce to THEIR creamery and not, as in the past, to THE creamery."

"We, the dairy farmers of this district, wish to thank all those who have supported them in the past and can assure them and future new customers that it is our intention to give them the best possible service together with the finest product that can be made."

"We hope the public will take the opportunity to visit us in order to see their milk being processed in this most modern and hygienic plant in Kelowna."

SODICA STAFF—KELOWNA BRANCH

THE MEN BEHIND the wheels, so to speak, who are members of the SODICA staff in Kelowna, are shown in the above picture. They will be on hand Wednesday afternoon to explain details of the modern plant, which will be open to public inspection from 3 to 6 p.m.

Front row, left to right, Vince Kolodychuk, Elmer Ewing, Fred Allan and Albert Amundrud. Back row, left to right, Henry Amundrud, manager; Johnnie Giesbrecht, Lee Bowser, John Frankie and Mike Blake.

SODICA President Says Co-operation Keynote Success Dairy Industry

"Co-operation was the only answer" for sane dairying and keeping the money in the Okanagan instead of going "to investors hundreds of miles away," according to S. E. Halks, president of Shuswap-Okanagan Dairy Industries Co-operative Association.

Mr. Halks' valued opinion is contained in a short article written by himself for this issue to review the brief history of the local SODICA plant, the lengthy history of the entire co-operative and its inner workings. Mr. Halks' story follows:

Let us in the year 1950, a group of dairy farmers from the Kelowna district paid a visit to our Vernon office. They were in difficulties and asked if we could assist them to solve their problems. As a co-operative organization believing in neighbors working together for their mutual benefit, we welcomed them, and had several subsequent meetings with them.

These events have resulted in many of the dairymen in the Kelowna district becoming members of our association. Now we see the opening of a new modern dairy plant in Kelowna to take care of the production of these co-minded farmers and assure the people of Kelowna an ample supply of the best quality dairy foods.

STARTED 26 YEARS AGO
Many people in Kelowna may wonder who these people are whom their neighbors are co-operating with. Frankly, we are a group of dairymen who also found themselves in difficulties 26 years ago and then decided to do something about it. Just like the farmers in your district did last year. We knew that co-operation was the only answer.

We knew that by controlling our own business, we would keep the money in the valley to circulate among the businessmen and ourselves, instead of sending it out of the valley to investors hundreds of miles away. All money over and above operating expenses and plant maintenance goes back to our members and in the past 26 years, has created a tremendous amount of business for the cities and towns of this valley.

Every dollar's worth of value in our organization in plants and equipment, including the new plant in Kelowna, is entirely owned and controlled by our farmer members.

DIRECTORS ELECTED
We have a board of directors consisting of nine dairymen, each representing a certain district of our territory. These men are elected at a meeting in their own district, held prior to our annual meeting. Our members in the Kelowna district elected K. R. Young to represent them on the board.

We first operated plants at Vernon and Enderby and several years ago the members of the Salmon Arm Creamery and ourselves joined together and last spring we opened a new \$70,000 modern plant at Salmon Arm. This amalgamation has been of great benefit to the farmers and businessmen of this territory, which extends from Kelowna north to Revelstoke, west to Chase, and south through the Salmon River valley.

In the past 26 years, through co-operation, we have built up \$400,000 in plants, and last year we did well over \$1,000,000 in business.

KEPT MONEY CIRCULATING
Our success is largely due to the support and co-operation we have received from the businessmen and consumers of the valley, who have purchased our products and kept

A. T. ROTH, who handles the distribution of NOCA products in Kelowna district. Eight trucks serve the city and rural areas. Mr. Roth has been in the dairy business for 18 years and is a well-known figure in the Okanagan.

TOUGH JOB
The huge refrigerated ice cream trucks operated by the Co-operative farmers have tough conditions to overcome. On the hottest days of the year, they must safely transport ice cream to their many customers. These huge trucks cost over \$10,000 each. They can be seen carefully driving up and down the valley almost any day of the year. The drivers of these trucks are Wally Zaccour, who owns a home in Kelowna, and Butch Kaneda who is a Vernon man.

COTTAGE CHEESE A BARGAIN
One pound of cottage cheese contains one hundred times as much calcium as a pound of steak. It also contains twice as much protein. Yet a pound of cottage cheese sells for less than 25 cents. The Shuswap Okanagan Dairy Industries Co-op manufactures cottage cheese fresh each day. It is available in all Kelowna stores catering to quality-minded customers.

NOCA MILK DRIVERS

THESE ARE THE MEN who are responsible for delivering NOCA milk in the early hours of the morning. Reading left to right are Peter Simpson, A. T. Roth, E. Christianson, W. Geisbrecht, Peter Limenko and J. Cundy. Sitting in front is Ted Gaudreau, while Gary Roth is standing in front of Mr. Cundy.

Three Cardinal Principles For Efficient Operations, Says B.C. Dairy Official

By JACK MACE,
Assistant, Dairy Herd Improvement Work,
B.C. Department of Agriculture

PRODUCTION—economical production—is the key to success in any industry. The dairy industry is no exception. High food costs, high taxes and increasing land values, the necessity of competing with industrial wages to secure farm labor; all tend to stress the importance of getting the highest possible production from our dairy cattle at the lowest possible cost.

An efficient dairy operation must observe three cardinal principles, none of them new but all more important than ever. They are: breeding, feeding and weeding. The cow-testing associations in British Columbia can, and do offer valuable assistance and guidance in all three of these fields.

That this is being more widely recognized by the dairymen of the province is shown by the fact that each year new routes are being put into operation at the request of these men, three new routes having been started in the last two years.

FOURTEEN IN OPERATION
At the present time, fourteen cow-testing associations, having nineteen routes, are in operation; one in the Okanagan, three on Vancouver Island and the remainder in the Fraser Valley. A total of 10,000 cows are under test in these associations and the results of this testing program may be shown by the steady increase in production since the inception of this program by the Department of Agriculture in 1919.

In 1921, with 500 completed milking periods, average production was 307 lbs. of butterfat;

In 1930, with 3,700 completed milking periods, average production was 337 lbs. of butterfat;

In 1940, with 6,000 completed milking periods, average production was 382 lbs. of butterfat;

In 1950, with 7,300 completed milking periods, average production was 393 lbs. of butterfat.

The dollars and cents value of testing is well illustrated by comparing the 1950 figures with the average fat production of the dairy herds in this province, which is under 300 pounds of butterfat. This extra 100 pounds of fat for each cow can certainly mean the difference between a thriving farm operation and a losing one.

PAID BY TESTING FEES

British Columbia Cow-testing Associations operate under regulations of the Herd Improvement Services Division, through the Livestock Branch of the British Columbia Department of Agriculture and the wages of the supervisors are paid by testing fees charged members, supplemented by subsidies from the department. A uniform scale of testing fees is now in operation throughout the province.

In order to start a cow-testing association, from 23 to 25 dairy farmers in a district who are interested in improving their herds, organize a society under the Societies Act, then make application to Herd Improvement Services Division for a supervisor for their association. A two-week short course is conducted when needed, usually at the University of British Columbia, for men who have the necessary qualifications to be competent supervisors, where they are trained in the Babcock butterfat test and taught a necessarily uniform technique of arithmetic and herd bookkeeping, of those who pass the examinations at the end of this course, the names of the most suitable are placed on a waiting list to be notified when a vacancy occurs.

RECORDS INFORMATION

The supervisor calls on each member of an association once a month and at this time weighs the milk from each cow, and takes a representative sample of the milk. He takes his first weight and sample during the evening or afternoon milking and another at the morning milking.

The herd owner is responsible for boarding the tester during the time he may be at his place and in the case of single men, will usually provide sleeping accommodation for one night—married men are generally placed in the more compact routes and so go home at

night. Usually after breakfast he will run his butterfat tests on the composite milk samples taken from each cow.

He then enters his findings in a herd book, kept at the farm for this purpose. This book contains information on a sheet for each cow, in respect to identification, freshening date, number of days the cow has been milking, weights and test of milk at each visit and cumulative fat totals to date.

Average daily production of milk and fat for the herd is shown in the monthly report. The value and weight of each feed in the ration is also indicated here when the herd is on winter feed. From these various details a study of the ration being fed can be made, to determine the advisability, or need, of changes in feed.

ARRIVE AT AVERAGES

Particulars of completed milking periods are sent in periodically by the supervisors and are used in arriving at annual production averages, breed averages, parental production summaries and sire lists for the four main dairy breeds. C.T.A. members are not required to weigh milk or keep up milk weight sheets.

The testers do all necessary record keeping and provide all equipment, including their own car, milk scales, extra milk pail, acid and centrifuge. The main thing asked of the member is to supply full and accurate information on calving dates and parentage of animals where possible, for calf tagging and sire list work.

For the past two years the B.C. Dairymen's Association has conducted a competition for C.T.A. herds having a high percentage of "ton-of-fat" cows in them. A herd, to be eligible for this competition, must have 25 percent of the milking periods completed during the year, belong to cows whose total lifetime production exceeds 2,000 pounds of butterfat.

BY PERSONAL VISITS

Feeding, fertilizing and farming methods of all contestants were determined by personal visits and in view of the general agreement about certain practices, it has been felt that these may well be regarded as fundamental principles in keeping high producing cows in these herds for longer than average periods. Herd Improvement Circular No. 49, "Feeding Methods and Feeding Practices in Leading C.T.A. Herds" lists the results of the competition in full, but they may be briefly summarized as follows:

1. Lime and fertilize your land, according to soil analysis.
2. Feed a good quality, adequate balanced ration.
3. Vaccinate your calves.
4. Raise your own replacements from carefully selected, tested sires and dams.
5. Bed heavily to protect cows' udders.
6. Don't depend entirely on pasture for summer feed.
7. Keep your herd on test all of the time, in order to feed properly and follow an intelligent replacement program.

COWS GREAT DRINKERS

Cows eat lots of good malt from the brewery when they can get it. For every gallon of milk a cow produces, she requires five gallons of water. A cow which produces four gallons of milk per day, therefore, needs twenty gallons of water per day. As a rule dairy cows do not obtain sufficient water during the winter months. Consequently their milk production is down at that season of the year.

and food stores to handle. Each cheese is individually banded and waxed with a special wax preparation which has the effect of encouraging the development of a wonderful aroma and flavor.

When the Royal Train passed through Salmon Arm in October, 1951, the Royal Party was presented with a Salmon Arm cheese. This was done on instructions of the department of state in Ottawa. Their Royal Highnesses were so delighted with the flavor and aroma of this British Columbia product that the mayor of Salmon Arm re-

KELOWNA MILK GOES TO MARKET

Approximately 3½ million lbs. of milk produced in the Kelowna district by local dairy farmers who are members of the Co-operative will be marketed here at home. When this 3½ million pounds of milk travel from Kelowna farms to dairy plants, it will use approximately 40 miles of local highways. Very few Kelowna farmers haul their own milk. Seventy-five per cent of the Kelowna and district milk hauling is done on hard-surfaced roads. This movement of Kelowna's annual milk output by Cooperative producers, covers a total distance of 14,600 miles approximately, or about five times across Canada from one ocean to the other.

VANCOUVER, B.C.

Farmers Have Come A Long Way Since Co-operative Started 25 Years Ago

HOW could one balance a farm budget if costs are more than one takes in? This question was posed twenty-five years ago at a meeting of dairy farmers in the North Okanagan. These men looked into the future. They examined their circumstances, and decided that a farmer's co-operative dairy marketing organization was the only answer for them.

How were they going to pay their debts? They were the backbone, the rank and file, and they didn't know how they were going to make out if they didn't work together.

During their first few years of operation, these co-operative farmers made slow progress. At times it was very discouraging. One or two years they even had a "deficit" at the end of the year. Nevertheless they persisted and pioneered and they gradually learned the neighborly art of working together.

There are now over 1,000 members in the Shuswap Okanagan Dairy Industries Co-operative. These farmers own dairy plants at Salmon Arm, Enderby, Vernon, and Kelowna. The net value of the plants they now possess is in excess of \$400,000.

Despite competition, the dairy farmers and their families have continued to forge ahead. They have put their faith in the sound principle of "co-operation" and by working together they found they were able to hire plant technicians, office workers, salesmen, and management as well as any larger concern could do. At their annual general meetings they elect their directors who are "farmers like themselves." These men lay down the business policy of the association. It is carried out by the staff they have gradually organized and set up over the years.

QUALITY OBJECTIVE

As a basic principle of operations, the dairy farmers took the word "quality" as their number one objective. They strongly felt their obligation to the mothers and the families of the Okanagan valley. They decided that these mothers and children would have the highest in quality of dairy products possible to obtain in Canada. So well have these principles been carried out over the quarter century of the association's operations, that no less than 52 first prizes and highest awards have come to the products of the association.

Last October, when Princess Elizabeth and Prince Phillip were officially touring Canada, the department of state in Ottawa authorized the Salmon Arm creamery (one of the farmers' plants) to supply Arm cheese to the Royal Train. Salmon Arm cheese is a product of the farmers' co-operative organization. It, like the farmers' other dairy products, NOCA ice cream, NOCA

ed to build up their own home communities.

SOUND POLICY

That this policy is sound can be gauged by the fact that in the course of its life, the association has paid out in cash, monthly, to its farmer members, millions of dollars. At the present time, its monthly cash payments to farmers are approximately \$75,000 per month. A good substantial part of this is paid to the farmers in the Kelowna district who are members.

The benefit of the loyalty of valley merchants to their own home Okanagan co-operative farmers can be seen through a consideration of the following. The farmers mostly use their milk cheques and cream cheques to buy their daily grocery necessities, clothing for their children, school supplies, etc. Every time a dollar is sent out to the prairies for butter or ice cream, or powdered or condensed milk, that much money is gone from the Okanagan Valley forever. It does not increase business for the merchants of this area. On the other hand it makes the local merchants poorer.

However, when that same dollar is paid to the Shuswap Okanagan Dairy Industries Co-operative, it remains at home and the farmers and their families spend it quickly in the local stores. Everywhere in North America is a strong demand being made to "develop our home industry." Where this is being done the people as a whole receive a rich blessing and the bounty of permanent jobs and good conditions. But, where districts are impoverished by sending their money to far away points to purchase things that could be obtained at home, everyone suffers.

The farmers' association has recently completed the construction of a splendid dairy plant on Richter Street. It is the fourth such plant the farmers now possess. It is considered by experts to be one of the best. It is a model of modern science and compact arrangement and organization, in order to save costly space and labor and make it easy to provide the people of Kelowna with the finest quality of dairy products they have ever had.

It is well known that dairy foods are the most essential of all. Early in the war it was discovered that airmen would suffer from a form of blindness, because of the glare of the waters of the ocean and the glare of the light of high altitudes. This is the same type of blindness which cause automobile accidents on our Okanagan highways. It is sometimes known as night blindness. Its effect on a person driving

CO-OP LEADER

EVERARD CLARKE

General manager of SODICA has spent a lifetime in the farmers' co-operative movement. His father was the first president of the farmers' dairy pool in Alberta.

a car leaves them blind for a few seconds after meeting the glaring headlights of another car on a dark night.

Scientists and nutritionists discovered that creamery butter and fresh pasteurized milk contains riboflavin. They also found that if this was used sufficiently in the diet of a person it would materially aid that person with regard to better eyesight and avoiding night blindness. For this reason the airmen in Canada's air force, and soon after the members of all the armed forces of Canada were given creamery butter and fresh pasteurized milk everywhere in Canada and as far as possible in the actual theatres of combat.

Boys and girls who are attending school, in competition with members of other families, seeking to do well in their studies and at their sports, know the benefits of a diet rich in dairy products. Most schools have dietitians on their teaching staffs. In fact, the necessity for a large volume of continuously supplied dairy products available in the homes at all times is disputed by few, if any.

BENEFIT COMMUNITY

What asset can be greater therefore, than the new co-operative dairy plant in Kelowna. It is something for the health and benefit of the whole community. It will provide a very much needed service to many. As it is a farmers' co-operative, operated for the benefit of the citizens as a whole, and the

Dairy Industry Vital Service To Community

G. D. JOHNSON
(Okanagan Dairy Inspector)

IT has been reported that British Columbia has shown the greatest post-war increase in population above all other Provinces in Canada. Perhaps this can be said of the Okanagan in respect to the rest of British Columbia. In any event, the Okanagan can be justly proud of its present status and its very hopeful future.

In all well organized areas, the growth of population must bring about an increase in industry and public utilities. The dairy branch, provincial department of agriculture takes a great deal of pleasure in realizing that the dairy industry in the Okanagan maintains its responsibility in this regard.

Whilst dairying cannot be considered as a public utility, it definitely is a vital public service. We have read and heard a great deal with respect to the cost of milk and other dairy products. When one stops to consider the cost of handling one quart of milk from the cow to the consumer at the present high level of labor and materials, as against the production and handling of one pound of beef or a dozen eggs, the cost increase of the milk is far greater. This same statement can apply to many other every day commodities. Yet we in the Okanagan enjoy the second lowest price

for a quart of milk in the whole of B.C. It is one cent per quart lower in the Peace River District.

GREAT STRIDES

During the past few years the dairy industry has made great strides in the scientific field of milk production and processing. This, in turn, has necessitated more up-to-date equipment, both on the farm and in the manufacturing plants. People do not need to be told that equipment of any kind has reduced the value of our Canadian dollar anywhere from 50% to 75%.

In addition, scientific control of milk has brought about new provincial and local regulations concerning the care to be given the production and handling of milk.

farmers who are the producers. It is really an integral part of the community itself.

S.O.D.I.C.A. OFFICIALS

TWO MEMBERS of the Shuswap Okanagan Dairy Industries Co-operative Association's staff are R. H. Cull, manager of the Vernon branch, and W. C. Cameron, executive assistant of SODICA.

These regulations have required more up-to-date and sanitary buildings and facilities, again both on the farm and at the dairy plants. Anybody who has found it necessary to build or alter a home during the past few years can readily realize the costs faced by the farmer and dairy organizations in their endeavors to keep up, not only with the above requirements, but also with the expansion in population.

MODERN FARMS

It should hardly be necessary to add that the dairy farmers throughout the whole of the Okanagan have carried out their duties and responsibilities to the public in no uncertain manner. They have not only modernized their farm buildings but have made the Okanagan self-sufficient in the production of high quality milk, suitable for the most exacting market, that is, your babies.

This, they have done, in spite of labor shortage, increased costs in building and equipment, at no greater increase to the consumer than 33% since the war years. What other every day commodity can show such a small increase? Especially one so full of food value and nutriment, that it is justly named "Nature's Most Perfect Food."

Many of these farmers, being co-operatively minded, have interested themselves in processing and manufacturing plants. In keeping with the times, they have found it necessary to improve and expand these plants, even in the face of sky-rocketing costs, so that today we find that the Okanagan has some of the most up-to-date dairy

plants in Western Canada.

PUBLIC SERVICE

Kelowna, in particular, is in this preferred position. With the opening of the new milk-processing plant on Richter Street, to be operated by the Shuswap Okanagan Dairy Industries Co-operative Association, the dairy industry can be proud of its efforts to maintain its public service.

The dairy branch, department of agriculture, wishes to sincerely thank all the dairy farmers in the Okanagan for their loyalty and faith in an industry that serves the public so generously and unstintingly. It also takes this opportunity to wish the whole of the Okanagan Dairy Industry the compliments of the season and may 1932 bring health, happiness and increased prosperity to an industry so well deserving.

ICE CREAM CONTAINS EGGS

One of the reasons doctors recommend ice cream for invalids both at the hospital and at home, is that this food contains eggs. According to regulations of the Federal Department of Agriculture, ice cream must contain not less than 38 per cent milk solids. The large low temperature ice cream cold storage room has been constructed in the new dairy in Richter street. It is for the benefit of the restaurants in Kelowna who support the local dairy farmers through supplying their customers with NOCA ice cream. A temperature of 15 degrees below zero is maintained in the ice cream storage room on the hottest days of the year.

Jaycees and City Crews Will Pick Up Debris Wednesday

Local Citizens Urged To Co-operate

ANNUAL "Paint-up, Clean-up" week, sponsored by the Kelowna Junior Chamber of Commerce, is being observed in Kelowna all this week.

Were it not for the community-minded members of the Junior Chamber, this annual event would probably go unnoticed, and the public therefore is requested to co-operate by taking an interest in the campaign.

Arrangements have been made with the city public works department to have at least six trucks available Wednesday afternoon to pick up garbage. Members of the Junior Chamber, all of whom are businessmen, and like most other people, have limited time on their hands, nevertheless have volunteered their services to help the public works' crews.

They, too, will don a pair of overalls and will act as swam-pers on the city trucks.

Residents are asked to have garages neatly piled in cardboard boxes or wooden containers ready for the men to pick up. Of course, any debris which can be burned, should be put on a bonfire, as the Jaycees are going to have a tough time covering the entire city in half a day.

The garbage disposal crews will start out shortly after the lunch hour, and they hope to cover the whole city before five o'clock.

CLEAN UP PROPERTY

While a garbage pick-up service plays a major role in the "Paint-up, Clean-up" week, residents can also cooperate by cleaning up untidy boulevards, yards, clipping shrubs, and in general, give their property a "spring cleaning."

Kelowna has always been noted for being spotlessly clean, and in order that the city maintains this enviable record, citizens must play their part. If the house, garage or wooded needs a coat of paint, the co-operative citizen is one that will start wielding a paint brush. It's surprising how quickly the job can be done. The Jaycees urge YOU to do your part.

BUTTERMILK IS PRODUCED IN KELOWNA

Buttermilk—the pioneer of refreshing beverages is now to be produced here in Kelowna. Many memories are cherished by those who drank buttermilk from the old wooden churn and dipped from a crock in the spring house. Its cool tangy taste was refreshment at its finest.

This old fashioned buttermilk consisted of the remaining portion of the cream after Mother had churned the butter. It was known, not only as a refreshing beverage, but also for its therapeutic value. Housewives use buttermilk in their recipes to turn out baking of superb quality.

As the milk industry grew, the problems of this product grew also. There came a time when there was not enough butter churned commercially to fill the demand for this kind of buttermilk.

A solution of these problems has now been provided. The new Kelowna plant of the Co-operative dairy farmers will be producing cultured buttermilk. This is skim milk to which a starter has been added consisting of lactic acid bacteria. This buttermilk is not an imitation of the original old fashioned farm buttermilk. It is, rather, a substitute for it. It is produced by a method entirely different from that used to make the original.

Manufacturing high quality cultured buttermilk is a process by no means devoid of difficulties. In fact, each step in the processing procedure plays a very important part in the quality of the finished product.

The skim milk to be used must be of the very best quality. It must be handled in sterilized containers to prevent contamination from undesirable bacteria. It must be pasteurized to 185 degrees F. and held at that temperature for 60 minutes. The entire operation of the new Kelowna dairy plant, the efficiency of its employees, and the sincerity of its co-operative management can be judged by the appearance and taste of its buttermilk.

ACKNOWLEDGES CITY BYLAW

Deputy minister of health, Dr. G. F. Amyot, in a letter to city council, acknowledged receiving a copy of the city's amended bylaw affecting local restaurants. Dr. Amyot thought the amendment was satisfactory.

The bylaw now makes it compulsory for the medical health officer to inspect all meat sold in local restaurants.

This advertisement, based on an actual letter, is presented here by

**THE BANKS SERVING
YOUR COMMUNITY**

ICE CREAM INVENTED 100 YEARS AGO

The year 1951 was the centennial year of the ice cream industry. Just 100 years ago ice cream was first made in North America. It was for a special state dinner given by the President of the United States to visiting dignitaries from Europe.

WELL DONE, DAIRY FARMERS!

By GEORGE JOHNSON
(Dairy Inspector)

Few people among the bulk of dairy produce consumers, realize their debt of gratitude to the dairy farmer. On the other hand, practically one hundred percent of the dairy farmers realize their heavy responsibility to the consumer public.

Not only does the dairy farmer have to milk his cows at approximately 12-hour intervals every day in the year, but, having obtained the milk from the cows, he spends further time in protecting the milk by cooling and storing it until it is sent to the dairy plant. It is therefore not too difficult to understand that the average dairy farmer puts in at least a 14-hour day every day. This also applies to the farmer's wife, who usually has the chore of washing and sterilizing all the milking equipment every 12 hours for 365 days each year.

TWICE A DAY

Unfortunately for the farmer, and probably fortunately for the consumer, no means has yet been devised whereby cows can be taught not to produce their milk on some particular morning or evening to enable the farmer to take a half day off. (Whatever is said about six-day, or five-day or every

other day delivery of milk to the consumer, certainly cannot apply to the dairy cow. It delivers twice a day, every day. It is the farmer's responsibility to milk the cows on a regular schedule in order to maintain a year round supply of milk to the consumer. Cows milked irregularly give less milk and eventually go dry.

We in the Okanagan Valley are fortunate indeed in having a reliable group of dairy farmers to keep us supplied with a high quality daily milk supply and other dairy products. We are also fortunate in being able to purchase our milk at a price which is lower than practically every other area in B.C. In fact, Regina is the only large centre from coast to coast whose price is lower. This again indicates good management on the part of our Okanagan dairy farmers. Their successful operation means a saving to those people who need to watch every dollar, namely mothers with a large number of growing children and those on pension who just exist from month to month. Milk provides the needs for youngsters and old folks that no other single food can supply. Therefore, our dairy farmers deserve a great deal of credit for this human service they provide from day to day.

PERISHABLE PRODUCT

In addition to providing expensive dairy equipment on the farms for the production of clean wholesome milk, our farmers in the Okanagan, and particularly around Kelowna, realize the necessity of providing plants suitable to handle such a perishable product as milk. It is, with a great deal of pride, that the people of Kelowna can boast to many visitors of such up-to-date dairy plants as they are blessed with.

It is therefore with a great deal of pleasure that the dairy branch, provincial department of agriculture say "well done" to the dairy farmers in the Okanagan, and particularly to the members of the Shuswap Okanagan Dairy Industries Co-operative Association. These men, in spite of rising labor and material costs, saw the need of modernizing in keeping with the times, and have provided Kelowna with a most up-to-date plant equipped with very modern machinery.

HOLSTEINS HAVE MORE QUALITIES IN THEIR FAVOR

By RALPH WHIPPLE
President, North Okanagan Holstein Breeders' Association

"When a good business man goes to buy a cow, two principal factors are foremost in his mind. What trade-in value does it have and can he get repairs easily?"

"So when a good dairy man thinks of buying a cow, he considers how much money she will bring when he is finished with her. And as we cannot buy spare parts for cows, we must buy cows that are sturdy and who can bear calves which are healthy and strong, too."

For the man who is looking to the dairy cow for his living, he must not think only of milk or butterfat. But, he must make sure he has an animal that will bring him the greatest net return in terms of money, plus the most enjoyment and satisfaction while working with them.

Holsteins have far more qualities in their favor than any other breed. Fluid milk is one of the principal products of the dairy cow in the Okanagan now and it has been found wherever fluid milk is wanted, Holsteins are the most reliable breed from which to get it.

QUIET WHEN HANDLED
By Holsteins, I do not merely mean a black and white animal. In the sire division make sure you breed your cows to animals that have records of at least 600 pounds of butterfat with an average test of not less than 3.6 percent.

Now, these cows have size. The cows are from 1,500 pounds up to any size you wish to build them. The Holstein of today, if well cared for, is an animal that is wanted in regular market channels at any age. They are quiet when handled, or if otherwise, it can be blamed onto the human environment in which they have been forced to live in at some time.

They come into high production at an early age and are noted for their long life of high producing ability. Their color is very attractive, not only to work with, but it proves to be most pleasing in the show ring. Their bright eyes, straight legs, and freedom of movement all add up to their strong, sturdy constitution and ability to produce. They have proven to be successful in cross breeding experiments, as well.

In this day of artificial insemination, there is a Holstein sire

ready to serve your needs. Be sure to use him and obtain real satisfaction from raising your calves.

GLASS IMPORTANT
While the ancient Egyptians did not have a dairy industry such as now exists in the City of Kelowna, they did have a type of glass. It was very rare and only appeared in the palaces and was used for the purpose of holding flowers or other ornaments. A primitive type of glass was manufactured generally 1,400 years ago. Without the glass industry, to produce bottles, it would be impossible to supply milk to the Kelowna householders pasteurized and protected in super-clean containers. The cost of one milk bottle is approximately 16 cents.

Police Find Businessmen In Vernon Very Gullible

(EDITOR'S NOTE: The following story appeared recently in The Vernon News, regarding the number of bogus cheques which have been passed in the city. The same thing could apply here. For the benefit of local merchants, The Courier is reprinting the article in full.)

VERNON merchants and businessmen—you're gullible! In the past few weeks, you've been taken for hundreds of dollars by false pretence operators—worthless cheque artists and short change men—and that is why the Vernon detachment of the R.C.M.P. has today issued an urgent appeal to you to be wary of the stranger.

This is what the police have said: Don't accept cheques from strangers in payment for merchandise. Don't cash cheques for people you don't know personally. Don't accept cheques in payment for merchandise larger than the required sum, and then hand over a cash balance to the purchaser. In other words, stop playing into the hands of all these smooth operators who seem to be flooding the Valley from coast points.

Attention to the operations of him to pull the same trick again these men and women who cause both merchant and police unnecessary worry and grief, was revived last week when Hugh Campbell in the Vernon City Court pleaded guilty on four counts of false pretences, and was remanded for sentence.

He's only one of three bad cheque men currently in the Vernon cells.

Campbell had a long history of similar offences, and yet was able to come into Vernon and add to his list of victims. And all because merchants seem reluctant to deny a sale to the stranger who can't produce the ready cash.

MANY CONVICTIONS

Whatever the solution is, so far as prevention is concerned, police here wish merchants would find it quickly.

A total of about 20 convictions has been handed out in the Vernon, Coldstream, Armstrong and Endrey courts within the last 10 days on charges of issuing and writing phony cheques.

But before the man is brought to trial, police have to spend long hours poring over evidence, searching for the offender, waiting for

SUMMERLANDERS RALLY TO AID FIRE VICTIMS

SUMMERLAND—A blaze of unknown origin completely demolished the recently-acquired home of Mr. and Mrs. W. G. Gillard. More than half the contents of the house was saved but many valuable possessions of the Gillard family were lost in the blaze.

With the help of local organizations, friends and neighbors, the Gillard family has renovated another building on the property and has taken up temporary residence in the new quarters.

The Gillard family had just settled down for lunch, heard a crackling and smelled smoke. Investigation revealed a fire had commenced on a rear porch and while trying to put out the blaze there it was discovered that it had swept up the building into the upper story.

First attempt by Mrs. Gillard to call the fire brigade was not successful, it is understood, but eventually a call was put in and neighbors also appeared on the scene to assist.

It took only seven minutes for the brigade to reach the Gillard property at the top end of Prairie Valley from the time the alarm telephone sounded, but by that time the house was nearly engulfed.

Only water available was from the tank on the fire engine and attempts to get the fire engine through the orchard to tap a creek supply proved futile.

Fire Chief Ed Gould doubts if water had been available that much of the house could have been saved as the blaze had got a tremendous start.

Most of the contents of the living and dining rooms and the master bedroom downstairs were removed, but the contents of the children's bedrooms upstairs were completely lost.

Also destroyed were most of the appliances in the kitchen including kitchen stove, washing and sewing machines and a cream separator.

BUILT 45 YEARS AGO
The house is one of the oldest in the district having been constructed about 45 years ago. It was solidly built but once the fire got a start in the old timbers it blazed up fiercely.

Neighbors and the fire department managed to save better than 50 percent of the Gillard household belongings.

The house and contents were partly covered by insurance but not on a replacement basis.

Since the fire, friends and neighbors have been very helpful in getting the unfortunate family settled in new quarters.

Another building which was once a packing house, was available on

More Scout Leaders Urgently Required

"Be Prepared," the Boy Scouts motto, was mounted high on a green and yellow background as approximately 150 parents and friends attended the first annual Boy Scout dinner held at the Scout Hall on Tuesday, under the auspices of the Boy Scouts' auxiliary.

Peter Ritchie introduced the Boy Scout district president, F. Thorne, Jr.; Commissioner P. C. McCallum; city, Rotary and school representatives, Jack Treadgold, Dr. Harold Henderson and F. Bunce, respectively; divisional camp advisor for the North Okanagan, Mrs. H. W. Arbuckle; Guide leaders, Mrs. George Rannard and Mrs. C. Kelly, and the Scoutmaster, Craig Brodie, Glenmore; Jim Kitaura, Rutland; A. Thompson, East Kelowna and Bill Gordon, 1st Kelowna group. Mr. Ritchie commands the 2nd and 3rd Scout groups of Kelowna.

Commissioner McCallum stressed that unless Kelowna could find more Scout leaders, scouting activities would miss great opportunities. He mentioned that each group should have one troop leader and an assistant. At present there are only two leaders for the three groups. He appealed to the older Scouts to step forward and help out.

Speaking on behalf of the ladies' auxiliary, Mrs. Eyre, president, said it was the mothers' hope that in future years, they would be able to present outstanding Scouts with plaques or cups in recognition of their good work, and they also

the property and it is being renovated for use as a dwelling as a temporary measure.

A number of organizations have signified their intentions of assisting the Gillard family and, in order to avoid duplication, the Summerland Welcome Committee was pressed into service to detail the requirements.

Consequently showers, by Prairie Valley residents and by Lakeside United Church W.A. members are being arranged, the Red Cross has requisitioned for blankets and other organizations have signified their intentions of assisting.

In a time of emergency, the friendliness of people in a small community has once again been readily demonstrated in this case, it is stated.

Mr. Gillard is well-known as the agent at the CNR office in Summerland. He and Mrs. Gillard recently acquired orchard property and their new home in Prairie Valley for themselves and three children.

hoped to supply the Scouts with more equipment, in an attempt to bring scouting back to the standard of a few years back. It was her wish that more mothers would join the organization.

Mrs. Briscoe announced that the mothers' auxiliary would hold a rummage sale in June in an effort to raise funds and contributions would be appreciated. Anyone wishing to donate articles is asked to contact Mr. Ritchie.

Jerry and Brian Mills entertained with a few acrobatic favorites. Skits were performed by several Scout troops.

Bill Gordon officiated at the investiture of Brian Moir as a Scout.

FLOWER SHOW IS PLANNED AT PEACHLAND

PEACHLAND—At the Women's Institute meeting Friday, plans were made to hold the annual flower show on June 12 at the Legion Hall. Arrangements for the flower show will be under the convener-ship of Mrs. J. Stump.

Donations were made to the arthritic fund, and also to the cancer clinic. W.I. members have been canvassing for the cancer clinic again, this year. President Mrs. L. Fulk gave a report on the district rally held at Naramata recently, which she attended as delegate.

Also attending this rally were Mrs. Ayres, Mrs. A. MacKay, Mrs. B. Johnston, and Mrs. C. C. Heighway.

Mrs. A. West, who is in charge of the upkeep of the cenotaph, reported that the flower bed around the monument had been all replanted with roses and barberry hedge.

These shrubs had been kindly donated by B.C. Nurseries, and Mr. West had spent much time in cleaning out the flower bed, hauling earth and replanting the beds with the new shrubs.

After the business of the meeting, Mrs. H. Ibbotson introduced Mrs. Harwick, of Westbank, who gave a talk on shell work. Mrs. Harwick displayed a wonderful collection of articles made from shells, pictures, ornaments, animal figures, even

Diopogoni. This display and Mrs. Harwick's remarks were much enjoyed by the many members and visitors present.

Plants and cuttings were exchanged at the meeting by members, and tentative plans laid for the June meeting to be a horticultural one.

Hostesses Mrs. H. Ibbotson and Mrs. C. Whinton served a lovely lunch, to bring a most satisfactory meeting to a close.

PEACHLANDERS SATISFIED WITH WATER SYSTEM

PEACHLAND—At a meeting of the domestic water users which was called to discuss the condition of the water system, those present seemed satisfied with the amount of water and the pressure now being available.

It had been suggested by the chairman of the water committee, A. Miller, that a committee be appointed to take charge of the system, and it was also thought by the council to be an opportune time to discuss the repairing or replacement of the present system, as the debentures on this system mature on January 2, 1933.

About 25 attended this meeting. Conditions of the water mains were discussed and N. Evans, who has done considerable work for the past few years on maintaining the system, was of the opinion that the lines, where they had been undisturbed, were in very good condition, and most leaks, if not all, were at the collars. These needed repairing frequently. The majority of those present seemed to be of the same opinion, and wished to have the system operated as at present, with part of the water supplied by gravity from Trepanier Creek, and supplemented by lake water pumped into the line by the large pumping unit in town, which was installed about a year and a half ago.

This pump seems to give adequate pressure although not as efficient as when installed due to the leaks in the line increasing. Mr. Miller was of the opinion that the high cost of pumping could be cut by using gravity only, and having a smaller pump boost water over the "bump" with the large pump being kept for emergency only.

F. Topham, former reeve, stated that he felt the present system, if leaks in the line were kept repaired, would be able to operate for some years at small expense.

Regarding committee of water users to operate the system, the meeting definitely favored the chairman of the water committee continuing to be responsible for seeing that the system is maintained. The main difficulty at present seems to be that labor is very difficult to obtain for such part-time work, and the job does not warrant hiring a steady man. Figures show that the system is not operating at a loss, that here are about 85 or 90 users now compared to 50 in 1927 and gross revenue has increased from approximately \$1,000 to over \$3,000.

Hostesses Mrs. H. Ibbotson and Mrs. C. Whinton served a lovely lunch, to bring a most satisfactory meeting to a close.

MODERN STORES HAVE LARGE REFRIGERATORS

Some of the most modern stores in the province of British Columbia are located in Kelowna. Many of these Kelowna food establishments now have the most modern type of refrigeration. In a number of cases they purchased these through the dairy farmers' co-operative. Thereby indicating another type of teamwork and mutual neighborliness together.

These refrigerated cases hold frozen foods, ice cream, and butter, at safe temperatures, regardless of how hot or cold it may be outside. The cases are mostly equipped with a 1-3 h.p. hermetically sealed condensing unit, which is guaranteed for five years. The major feature of the type of refrigerated cases selected by the co-operative association for its own customers is great capacity. Some will hold as much as 240 quarts of milk, as well as having seven cubic feet of refrigerated by-product space.
